

AKRON PLASTICS

THERMOPLASTICS

AKRON Porcelain & Plastics maintains a significant presence in the injection molding of Thermoplastics. Thermoplastic materials, unlike their Thermoset counterparts, can be ground and re-molded for most applications and are considered environmentally friendly. Currently, Thermoplastics are responsible for the vast majority of the world's plastics consumption. Today's design engineers have a significant selection of available Thermoplastic materials to choose from, depending on the application.

AKRON has successfully molded difficult applications, some which are part of assemblies utilizing both Thermosets and Thermoplastics. We can offer you the processes and expertise to follow your part from concept to finished product.

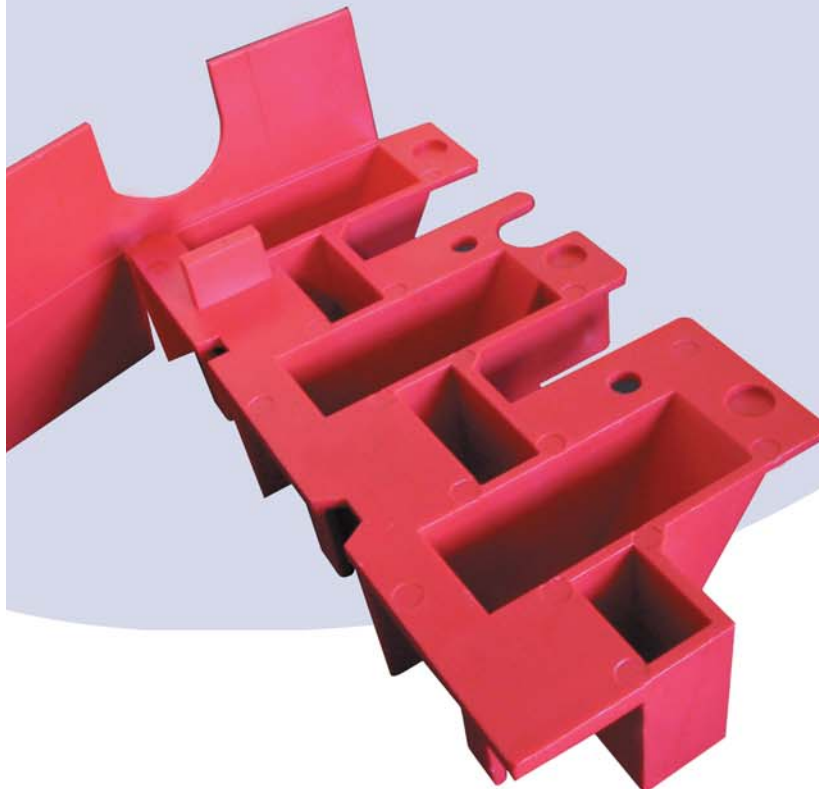

Let AKRON assist you with both raw material and process selection for all of your Thermoplastic needs.

Industries Served

Electrical Distribution Automotive Major Appliance
Commercial Lighting Specialty Parts

Materials Technology

Polypropylenes • Polyethylenes • ABS • Acetal
Nylon • Polycarbonate • PPS • PPO • PPE • PET • PBT

Custom-Molded Plastics
Thermoplastics Technology
