

# AKRON OIL & GAS

## DESIGN & DETAIL

### **Frac Balls**

Contact AKRON as a leader of thermoset material and processing technology to satisfy all of your frac ball needs.

We use thermoset frac ball materials (both phenolics and glass-filled polyesters) that range from specific gravities of 1.3 -3.6. These same frac ball materials have compression strengths ranging from app. 11000-51000 psi. Combine these values with cost-effective processing and superior engineering service and all of your thermoset frac ball needs will be met by Akron. ***Please call today for a quote for your requirements!***

### **Down Hole Thermoset and Technical Ceramic Molding Technology**

AKRON has been a leader for over 50 years in thermoset molding and raw material evaluation. In addition, we have excelled in molded and extruded ceramics for over 100 years. Please contact us for engineering assistance using thermoset and/or technical ceramic materials for all of your down-hole applications.

If you have issues with heat and pressure, AKRON can help with all of your needs. ***Call AKRON today!***
